

ANTI-VIRAL FOGGER

ANTI-VIRAL FOGGER is tested to BS EN 1276, 1650 & 14476. It is effective against 99.999% of bacteria, yeast & enveloped viruses including coronavirus, & leaves a clean and fresh fragrance. ANTI-VIRAL FOGGER is a perfect solution where vehicles and small cubicles need to be sanitised quickly and effectively. Within 15 minutes, all surfaces will have an anti-bacterial layer and the air will have been sanitised.

- Contains over 90% alcohol
- Ideal for vehicles & small cubicles
- Leaves an anti-viral layer on all surfaces
- Leaves no residue
- Simple & quick to use

Understanding Log Kill Scores

The Log Number of a sanitization product refers to the kill rate as defined by the Sterility Assurance Level (SAL). The higher the Log Number the more efficient the product at reducing the number of pathogens. Germicidal kill rate is measured as the number, out of 1,000,000, expected to survive the sanitization process when using the product.
