

ANTI-VIRAL FOGGER

ANTI-VIRAL FOGGER is tested to BS EN 1276, 1650 & 14476 . It is effective against 99.999% of bacteria, yeast & enveloped viruses including coronavirus, & leaves a clean and fresh fragrance. ANTI-VIRAL FOGGER is a perfect solution where an area of up to 100m³ needs to be sanitised quickly and within 15 minutes, all surfaces will have an anti-bacterial layer and the air will have been sanitised.

- Contains over 90% alcohol
- Anti-viral Fogger fills areas up to 100m³
- Leaves an anti-bacterial layer on all surfaces
- Leaves no residue
- Simple & quick to use

Understanding Log Kill Scores

The Log Number of a sanitization product refers to the kill rate as defined by the Sterility Assurance Level (SAL). The higher the Log Number the more efficient the product at reducing the number of pathogens. Germicidal kill rate is measured as the number, out of 1,000,000, expected to survive the sanitization process when using the product.
